This report is a reflection of the 2006 fiscal year in Research and Scholarly Activity. Exhibited by the charts and graphs contained in this report, it was another excellent year for TAMU-CC. The award level continues to be three times the level of ten years ago with greater diversity of participants than ever before.

The university has experienced major change over the past few years and the research agenda has continued to be pushed to the forefront. The faculty on this campus continue to pursue their research agendas and new faculty are being hired with research as a significant goal and with excellent research records. The future for the office of Graduate Studies and Research continues to be bright with several multi year awards already carrying us into the future. As of August 31, 2006, $6M was targeted for expending in FY07.

I would like to thank all of the faculty and administrators who have created the success of research on this campus.

Harvey Knull, PhD.
Dean of Graduate Studies and Associate Vice President for Research and Scholarly Activity

Héctor Pérez García, M.D. (1914-1996) was a Mexican-American Corpus Christi physician, surgeon, World War II veteran, civil rights advocate, and founder of the American G.I. Forum. As a result of the national prominence he earned through his work on behalf of Hispanic Americans, he was instrumental in the appointment of Mexican American and American G.I. Forum charter member Vicente Ximenes to the Equal Employment Opportunity Commission in 1966, was named alternate ambassador to the United Nations in 1967, was appointed to the United States Commission on Civil Rights in 1968, was awarded the Presidential Medal of Freedom, the nation’s highest honor, in 1984, and was named to the Order of St. Gregory the Great by Pope John Paul II in 1990. The year 2006 marks the 10 year anniversary of Dr. Héctor Pérez García’s death in Corpus Christi, Texas at age 82.

The number of proposals submitted in FY’06 is consistent with the 5 year average. The table above indicates a slight decrease in submissions as compared with FY’05. However, the positive news is that awards continue to be above 50% of proposals submitted. This is a very good success ratio. Based on this data, it could be said that one out of every two proposals submitted from the Research Office receives funding. There were 33 proposals still pending at the end of FY’06.
AWARDS BY COLLEGE / DEPARTMENT

Figure 3 shows the amount of funding in different university units including college and department. The good news for FY’06 is that the number of participating departments increased from last year. This year we have funding for Recreational Sports, Enrollment Services, Student Affairs and a significant increase in the Visual and Performing Arts. It is very exciting to witness the increase in participation as indicated by externally funded projects conducted across campus. With this type of participation it is anticipated that the awards for teaching, research, and service will continue to increase.

Figure 3: Awards by College/Department
REVENUE BY YEAR OF AWARD

Shown below is a chart of the revenue that was awarded in FY'06. This table only reflects monies that were actually awarded in this fiscal year, regardless of the project start and end date. Figure 5 differs from figure 4 in that it reflects the year when project expenditures are anticipated for multi-year awards. Figure 5 shows there is a significant number of multi-year awards because $6.52M is identified even before FY 2007 began. The implication is that FY 2007 will be a good year. In fact there is already $1.49M for FY 2008.

Figure 4: Revenue by year of Award

Figure 5: Revenue based on projected expenditure year - Allows projection for multi-year awards
The source of funding is an important component for researchers. Where do our dollars come from? In FY '06, we actually saw a decrease in Federal Funds dropping from just over $10M to just over $8M but a slight increase was noticed in State Funding. Overall, the funding level for FY '06 falls short of last year. The funding source remains predominately federal, with 64% of all awards originating with a federal source.

The type of awards granted to TAMU-CC remain consistent with last year. 43% of awards are targeted to Education and 57% are designated for Research. This is an important element of university funding. While we are very interested in increasing the “research” agenda and boosting funding for research, we must also continue to grow our academic programs and seek funding for students, scholarships and programs. Without Academics, the research could not exist. The current division is an appropriate split with slightly over half being targeted for research.
The expenditures for fiscal year 2006 include expenditures from prior year awards. (i.e. multi-year awards are spent across fiscal years)

Figure 8: Expenditures Sorted by Type
Figure 9 shows that expenditures are increasing and are at their highest level in FY’06. This is good news as funds coming back to the University from the State via Texas Research Development Funds are a function of the restricted research expenditures. Restricted research expenditures almost doubled the level of FY’05. It is exciting to see that more and more dollars are being expended for research on this campus.
The Texas Research Development Fund (TRDF) is awarded to Texas Universities from the State and is proportional to the amount of Restricted Research that is reported from 35 public 4 year institutions in Texas. Not all Universities are eligible for TRDF. Some institutions (University of Texas-Austin, TAMU-College Station, TAMU-Prairie View) receive Permanent University Funding (PUF). For FY ’06, Texas A&M University-Corpus Christi received $728K in TRDF monies. This money is awarded to faculty to encourage research on campus. The monies were divided for new faculty “start up” and for faculty research projects. Proposals are reviewed by external reviewers who in addition interview each PI. The reviewers recommend projects they perceive to have high probability for future federal funding. Below is a list of awardees for FY’06. Awards were made for ~$662K with the remaining monies being used to cover travel expenses for external reviewers and the residual to cover research related issues that arise throughout the year.

TOTAL

S&TSponsored Projects Annual Report Fiscal Year 2006
Support for students is a great benefit of grants/contracts. Figure XX shows that support for students continues to increase and has almost doubled since 2003. The amount of scholarships/assistantships shown here is reflective of the amount of support that comes from sponsored programs (i.e., grants/contracts) and is *not inclusive* of all scholarships/assistantships on the Texas A&M-Corpus Christi campus.

**TOTAL TRDF AWARDED:** $661,486

![Figure 10: Expenditures Sorted by Type](image)
Research Enhancement funding is at $110K per year. Of the total, $44K is distributed to the Colleges for College level awards. $66K is distributed by the office of Graduate Studies and Research. In FY06 there were many proposals worthy of funding so additional money was added to this pool from the Texas Research Development Funds in order to fund a total of $81K. Below is a list of the awardees for FY06.

The projects supported by the research enhancement committee are identified below:

**James Silliman**
Comparing Sample Preparation and Extraction Procedures for Organic Geochemical Applications
$14,107

**Lillian Waldbeser**
Isolation of Oyster Sperm Protein that Stimulates Spawning
$13,553

**Gregory Stunz**
Essential Nursery Habitat for Red Drum: Recruitment Patterns of an Economically Important Fish
$12,791

**Scott King**
Motion Capture of Prosodic Information for Speech Synchronization
$11,190

**Ajay Katangur**
Evaluating the Performance of an Optical Multistage Interconnection Network (OMIN) with and without crosstalk
$10,563

**Swint Friday**
"Does Fund Size Matter? An Examination of the Influence of Scale Economics, Asset Heterogeneity and Subsidization on Domestic and International Equity Mutual Fund Expense Ratios and Risk-Adjusted Performance"
$9,513

**Janis Haswell**
Researching the John Gardner Papers at the River Campus Libraries, University of Rochester
$7,163

**Elaine Young**
Outcomes of Collaborative Problem Solving with Children
$2,711

PURPOSE: This Council enhances and monitors academic research activities at the University, including research administration, program oversight, and program evaluation.

MEMBERSHIP: One faculty representative from each college recommended by the dean, plus directors of the University’s research centers, the chair of the Institutional Review Board, a representative from Comptroller’s Office, a representative from the Faculty Renaissance Center Advisory Committee, a representative from the library, and the immediate winner of the Faculty Research Award.

CHAIR: Associate Vice President for Research & Scholarly Activity

FY 2006 COUNCIL MEMBERS

- Knull, Harvey: CHAIR, Dean of Graduate Studies & Associate Vice President for Research & Scholarly Activity
- To be elected: Faculty, College of Science & Technology
- Cassidy, Jack: Center for Educational Development, Evaluation & Research (CEDER)
- Friday, Swint: Faculty, College of Business
- Haswell, Jan: Faculty, College of Liberal Arts
- Hay, Rick: Center for Water Supply Studies
- Jeffress, Gary: Blucher Institute
- Kreneck, Tom: Library
- Middleton, Karen: Institutional Review Board Chair
- Murray, Karen: Faculty, College of Nursing & Health Sciences
- Rhoades, Philip: Social Sciences Research Center
- Rosales, Jesus: Recipient of Faculty Research Award
- Southern, Steve: Faculty, College of Education
- Torres, Becky: Comptroller’s Office
- Tunnell, Wes: Center for Coastal Studies
- Jensen, David: National Spill Control School
- To be elected: Faculty Renaissance Center Communication Representative
The Institutional Review Board conducts review of research protocols that involve Human Subjects. As TAMU-CC increases in faculty numbers, the research on campus increases as well. This can be seen in the statistics below. The number of research protocols involving human subjects has almost doubled since 2003 and continues to grow with each passing year. This committee has a very serious charge and that is to protect humans who are used in research studies conducted by TAMU-CC faculty and students.

This committee is charged with ensuring the safety of animals used in University Research. The extent of animal research at Texas A&M University-Corpus Christi for 2006 was relatively confined to fish, turtles, snakes, and mice. The committee conducted a visual walk through of the animal facilities twice in 2006 and reviewed feeding logs and animal cages to ensure cleanliness and proper diet for the animals housed on campus.

The committee members for Fiscal Year 2006 are as follows:
Greg Stunz, Chair  
Scientific Representative
Kirk Cammarata  
Scientific Representative
Javier Villareal  
Non–Scientific Representative
Debbie Prevattl  
Community Member (Texas State Aquarium)
Doug Posey  
Veterinarian
Dr. Jesús Rosales joined the faculty of Texas A&M University-Corpus Christi as an ABD instructor in August 1993, and received his Ph.D. in Spanish in 1995 from Stanford University. With a focus in Chicano Literature written in Spanish, dedication to Mexican Literature and strong devotion to the creative works, Jesús has excelled in the area of scholarship and creative works as attested by his continuous publication record.

La narrativa de Alejandro Morales: Encuentro, historia y compromiso social was published by Peter Lang Publishers in 1999. In this monograph, Dr. Rosales examines in-depth Morales’ world, both personal and literary, in five of his major novels. In these works the author weaves the experience of his raza to save their contributions to a society that has chosen to ignore their existence. In his analysis, Rosales finds that the abandonados recover their voice and demand to be part of the historical tradition that has consistently overlooked their contributions and are given a second chance to take their rightful place in history as legitimate citizens of this country. Rosales’ book not only provides insights into Morales’ life and influences in his craft, but it also constitutes a Chicano literary microcosm of the narrative of Morales. This monograph has been complemented by various traditional scholarly articles published by leading university journals: Aztlán (UCLA Journal of Chicano Studies), Confluencia (University of Northern Colorado), and Cuadernos Americanos (Universidad Nacional Autónoma de México), among others.

In the creative writing arena, Dr. Rosales has been successful as well. In this area, he has published several short stories, such as “El camino”; “El retrovisor”; “Historia de un camino”; and “Los alacranes” in major creative-work journals and national Spanish language textbooks. In the last four years, however, most of his efforts have been directed to the creation of a new journal: PUENTES (BRIDGES). Revista méxico-chicana de literatura, cultura y arte. According to Dr. Rosales the goal of the journal is “…to promote Mexican and Chicano literature, culture, and art. Its major purpose is to strengthen cultural bridges between Mexicanos and Chicanos and to share the cultural ties that unite them.” This publication has been made possible by contributions from TAMU-CC and loyal readers. Only by taking into account all the efforts and time invested in this endeavor can one understand the social significance of such literary enterprise.

Dr. Rosales is currently working on a book-length project entitled Chicano Narrative Written in Spanish and a collection of short stories tentatively entitled Rastros de arena/Trails of Sand, and is committed to the continuous publication of PUENTES.

Dr. Jesús Rosales’ contributions to his field, his dedication to his students, and his low-key demeanor have earned him the respect of his colleagues and students alike.

Cammarata, K. Genomics-Based Curriculum Development for HSIs in South Texas USDA/CSREES Project Director’s Meeting, New Orleans, LA, Mar 28-Apr 1, 2005
Inducing Arsenic and Molybdenum Tolerance in Sunflowers Using Cysteine and Glutamate Amino Acid Treatments. Sigma Xi Student Research Conference, Seattle, WA, Nov 2005

MacDonald, I.R, Kastner, M, and Leifer, I. Estimates of natural hydrocarbon flux in the Gulf of Mexico basin from remote sensing data. European Geophysical Union, Vienna, Austria, 24-29 April 2005

Nañez-James, S., Stunz, G.W., Holt, S., Rooker, J.R., 2005. Identification of nursery habitat for juvenile southern flounder in Aransas Bay, Texas; American Society for Limnology and Oceanography; Salt Lake City, Utah

PRESENTATIONS, ABSTRACTS, POSTERS – LOCAL/REGIONAL

Gillinger, C., Muniz, S., Riojas, N., Gonzalez, A., Frankian, S., de la Rosa, A., Buck, G., 2005. Effect of recA on growth of E. coli strains in the presence of molybdate and/or nitrite. Fifth Annual Undergraduate Research Symposium, Texas A&M University- Corpus Christi (Second Place, C. Gillinger and A. de la Rosa)

Barr, R. and Cammarata, K. Hybridization of Helianthus cDNA with Arabidopsis Microarrays. TAMU-System Student Research Symposium, Kingsville, TX, Nov 2005

Barr, R. and Cammarata, K. Hybridization of Helianthus cDNA with Arabidopsis Microarrays. TAMU-CC Undergraduate Research Symposium, Corpus Christi, TX, Nov 2005

Cammarata, K., Markley, L., Campos, A., Riis-Due, S., and McBee, S. Amino Acid-Induced Tolerance to Arsenic and Molybdenum in Sunflowers: Mechanisms Relevant to Phytoremediation ? Emerging Technologies for a Sustainable Environment, South Padre Island, TX, Oct 20-21, 2005

Cammarata, K. Integration of Genomics into the Undergraduate Biology Curriculum. Texas Academy of Science, Edinburgh, TX, March 2005

Fikes, R.L., Coughlin, D., and Cammarata, K. Development of Procedures for the Analysis of Epiphyte Composition Associated with the Seagrass Thalassia testudinum. Texas Bays & Estuaries Meeting, Port Aransas, TX, April 20-21, 2006

Hillis, A., Sippel, K., and Cammarata, K. Protein Expression Profiling of Sunflower Plants Texas Academy of Science, Edinburgh, TX, March 2005

Mott, J. 2005. A Comparison of Two Phenotypic Methods and their Use in Combination with a Genotypic Technique as a Source Tracking Strategy. EPA-Region VI Technology Transfer Workshop to highlight practical application and usefulness of the various source tracking identification methodologies for use in EPA’s Total Maximum Daily Loads Program. Dallas, TX. Jan. 26, 2005

Mott, J. 2005. Bacteria Source Tracking – Copano Bay. Gulf of Mexico Mini Symposium Harte Research Institute, Texas A&M University-Corpus Christi, TX. Nov. 8, 2005

Mott, J. 2005. Beach Water Quality – Corpus Christi. Coastal Bend Bays Foundation. May 9, 2005

Fluker, Brook L., Russ L. Minton and Frank Pezold. 2005. Morphological variation of the Inland Silverside, Menidia beryllina, from the lower Mississippi River basin and Lake Pontchartrain, LA. ULM Student Research Symposium

James, J.T., Stunz, G.W., McKee, D.A., 2005. Catch and release mortality of spotted seatrout (Cynoscion nebulosus). Texas Bays and Estuaries Meeting, Port Aransas, TX

James, J.T., Stunz, G.W., McKee, D.A., 2005. Catch and release mortality of spotted seatrout (Cynoscion nebulosus). American Fisheries Society, Grapevine, TX
