V. Faculty Publications Bibliography 2001	22

The revenue for FY02 was \$10.1 million. The average for the past five years is \$10.4 million.

The grant and contract efforts, including revenues and a brief statement on expenditures for Texas A&M University-Corpus Christi are summarized in this report; the year resulted in many significant increases. These increases include revenue, number of submissions, number of proposals being awarded, number of multi-year awards and amount of F&A awarded to TAMU-CC. The absolute revenue level was down from last year (Fig. 1), however TEES revenue decreased.

Figure 1
Awards by Project Start Date

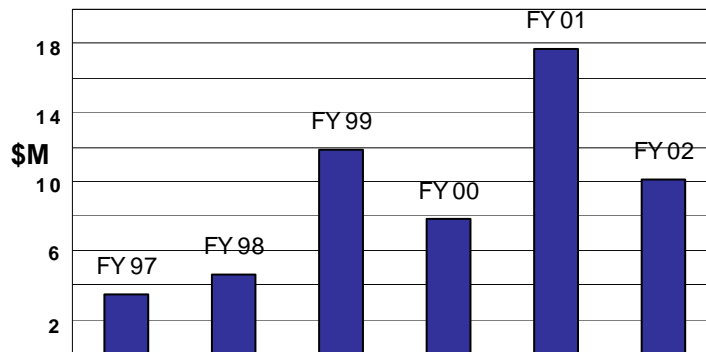

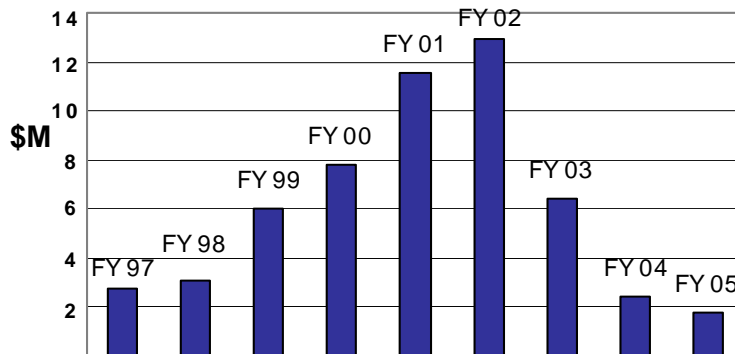

Figure 2
Revenue by Year. Multi year awards are dispersed into the projected expenditure year.

The average revenue for the past five years is \$10.4 million and for Fiscal Year 2002 is \$9.8 million. Fiscal Year 2001 is accentuated because of the \$6 million South Texas Rural Systemic Initiative grant from the National Science Foundation. When multi awards are divided appropriately into the award years, two important observations must be listed: first, project activity increased again in Fiscal Year 2002; second because of carry over money, \$6 million is already available in Fiscal Year 2003 and more than \$2 million in Fiscal Year 2004.

The number of awards was greater than any previous year.

In the past year TAMU-CC has opted not to use the Texas A&M Research Foundation in management of grant and contract submissions and accounting. Consequently the Research Foundation did not receive any TAMU-CC awards this year (Fig. 3). However, a few continuing grants will be managed by the Foundation until they expire (Fig. 4).

Figure 3
Annual Award Revenue Processed through RF, TEES and TAMU-CC

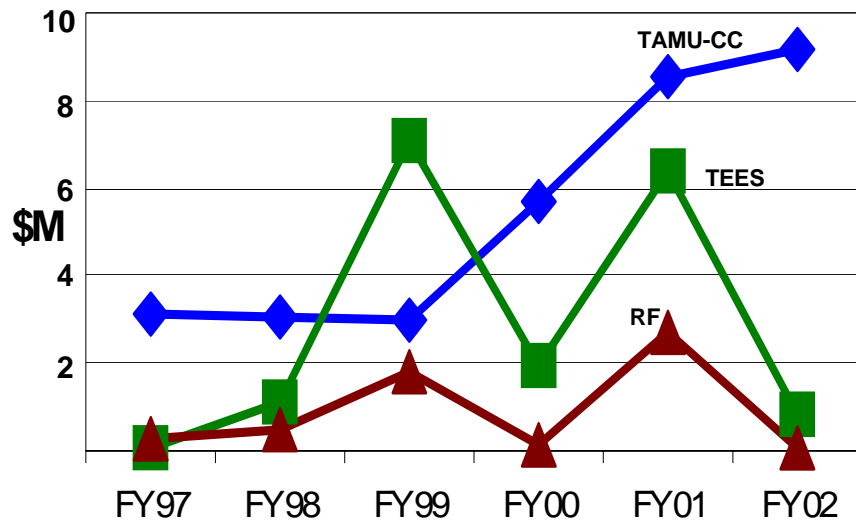

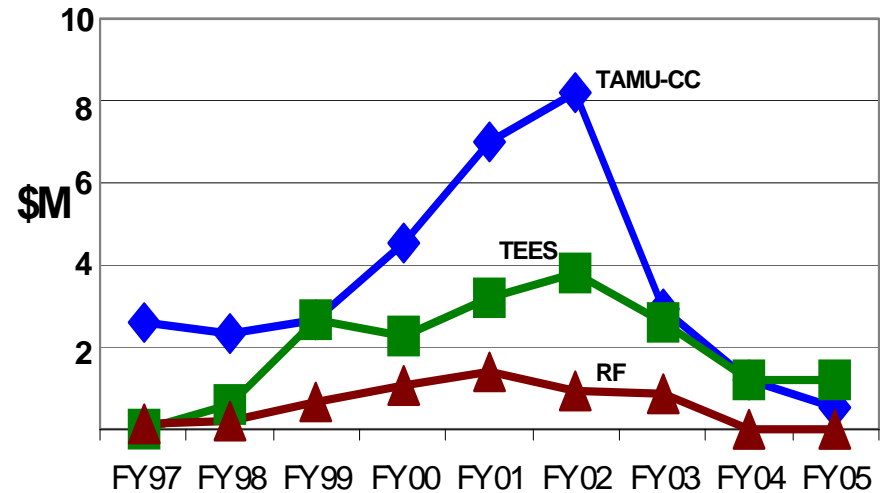

Figure 4
Multiyear Projects processed through RF, TEES and TAMU-CC are dispersed into the projected expenditure year.

The Research Foundation has managed 8-10 awards for each of the past three years. TAMU-CC and the Research Foundation negotiated an informal arrangement in which the Foundation will manage unique contracts.

The Texas Engineering Experiment Station (TEES) received \$849,281 in Fiscal Year 2002. Most of the TEES awards are multi-year awards while most of the awards managed by TAMU-CC are annual rather than multi-year awards; consequently the revenue dropped sharply in Fiscal Year 2003 (Fig. 4).

Approximately 50% of the awards are for research and approximately 50% of the revenue is from federal sources.

Figure 5a
Revenue by Source of Funds - FY 02

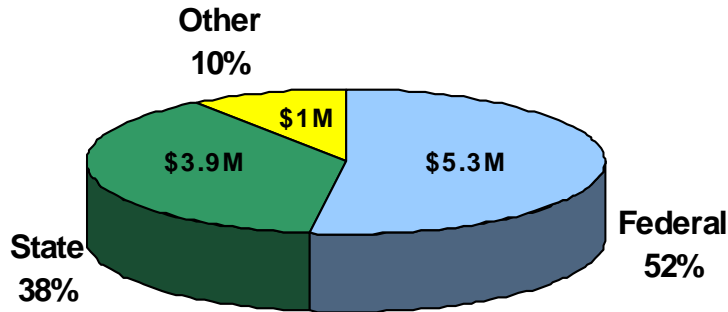

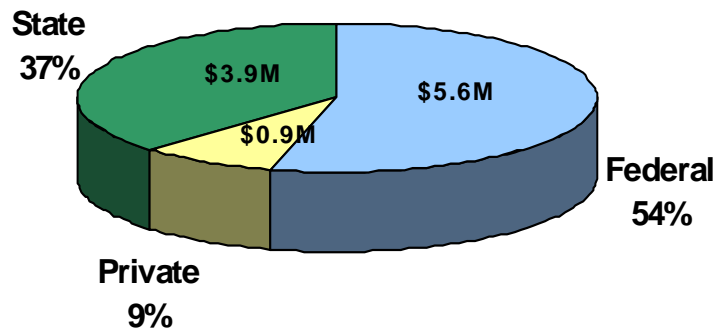

Figure 5b
Revenue by Source of Funds - Avg. 98-02

More than half of the monies coming to TAMU-CC in FY 02 were from federal sources (Fig. 5a). Over the past five years the average has been 54% (Fig. 5b). This is anticipated to increase as Harte scientists are recruited to TAMU-CC.

Figure 6a
Number of Awards via Education or Research - FY 02

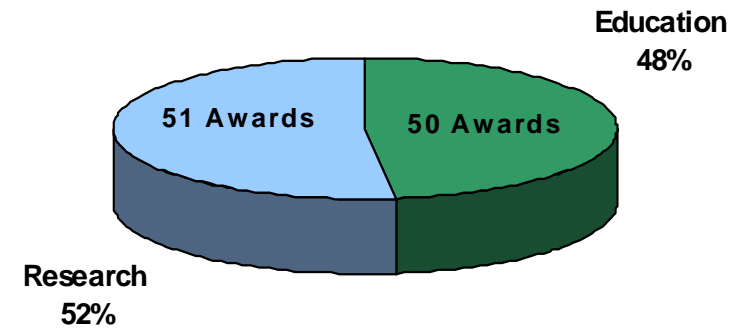

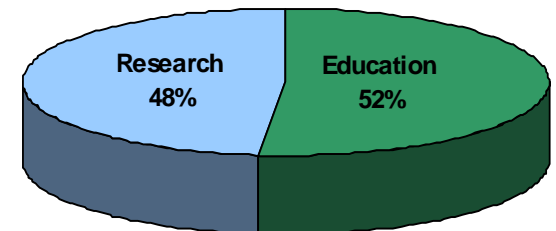

Figure 6b
Number of Awards via Education or Research - Avg. 98-02

The number of awards granted for research was approximately 50% this year (Fig. 6a) and the five year average is also near 50% (Fig.6b). The difficulty with operating in the \$10 million award range is that one large grant in any year skews the outcome. A case in point is the large NSF grant for education (South Texas RSI) awarded in 2001.

The number of submissions, number of awards and number of multi-year awards increased.

The information in Figure 7 indicates a rise in the number of submissions, which is very positive, and accordingly the number of awards increased.

The increase in the number of multiyear awards (Fig. 8) to twenty-five is the largest to date and is most encouraging. The total number of awards for Fiscal Year 2002 approached 100.

Figure 7
Number of Proposals

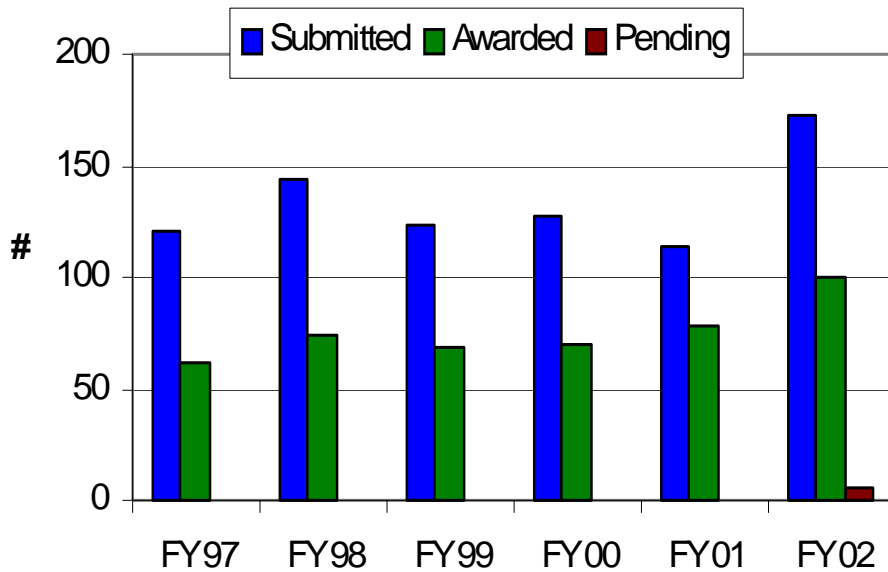

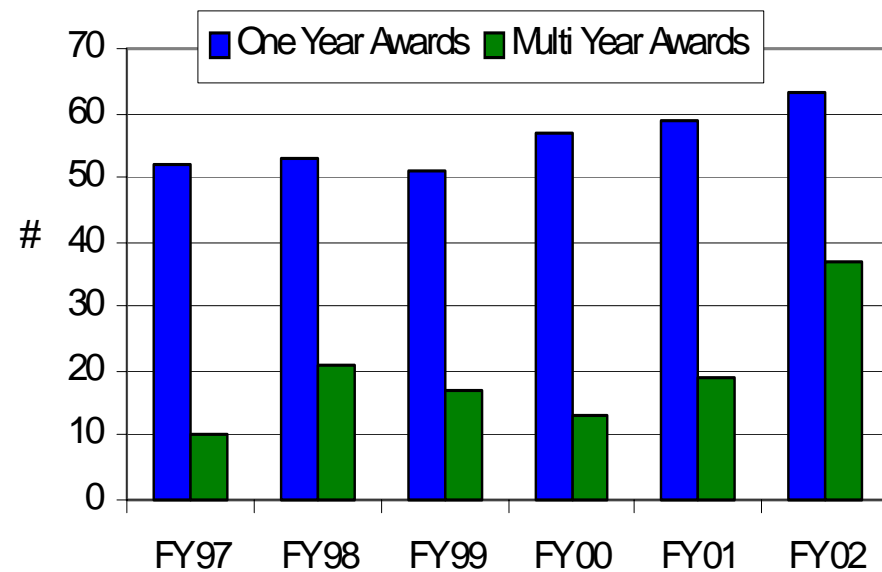

Figure 8
One Year Awards vs Multi Year Awards

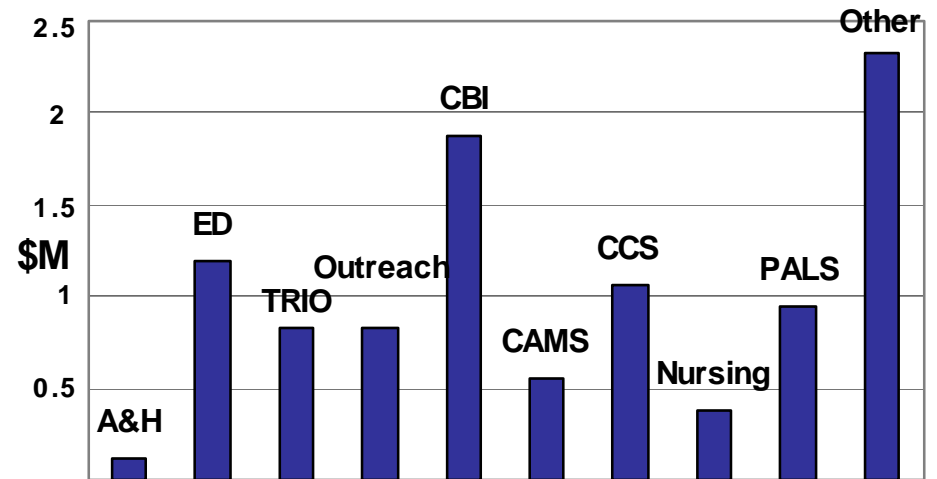

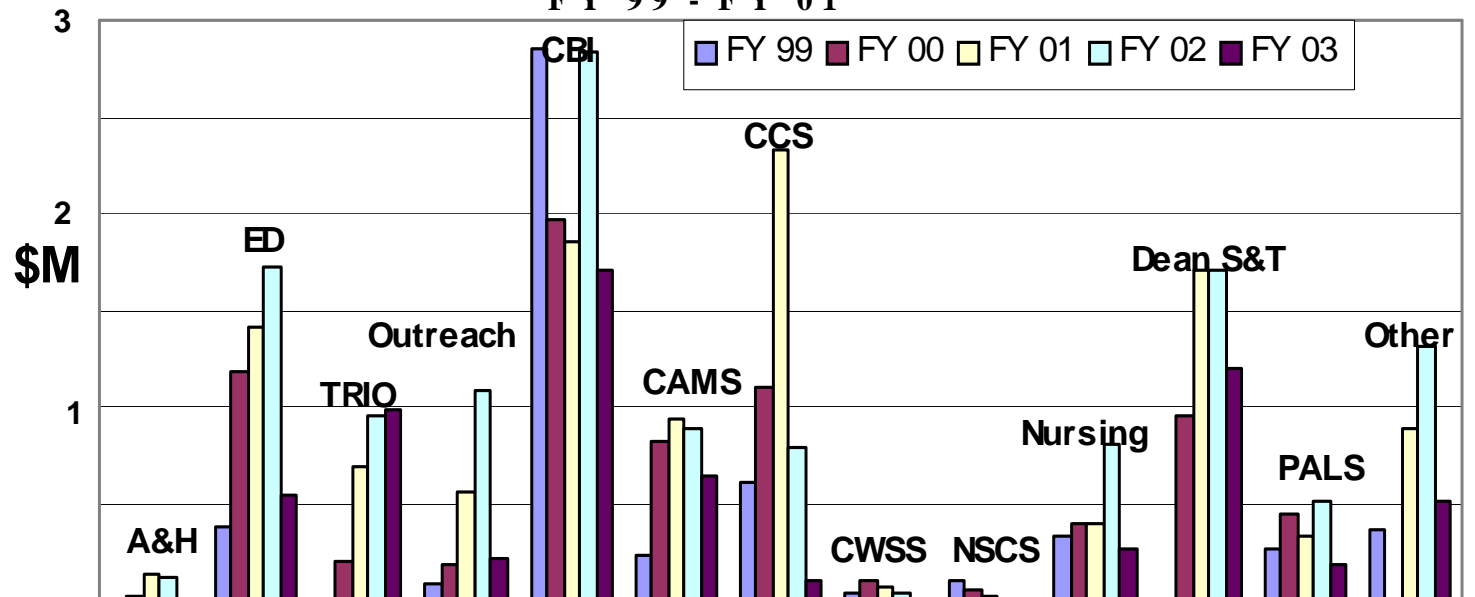

Awards are distributed widely accross the university.

The amount awarded to the different units on campus is shown in Figure 9 (annual awards) and a multi-year projection is shown in Figure 10. It is reassuring to have grant and contract activity spread over so many units and to find that several have funding spilling forward into Fiscal Year 2003.

**Figure 9
Award Amount by Department
FY 02**

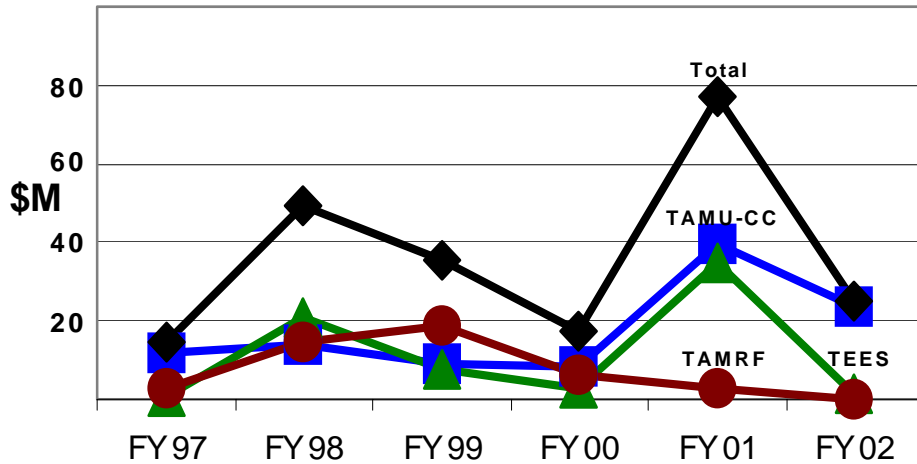

**Figure 10
Projected Revenue by Department
FY 99 - FY 01**

F&A received via TAMU-CC increased for the third consecutive year.

Figure 11
Total Amount Submitted by Year

Submission levels show great variation with a mean submission level of approximately \$40M (Fig. 11). Over the last two years, the greatest amounts were submitted through the TAMU-CC office and the current year indicates that essentially all submissions were through this office.

Facilities and Administration (F&A or formerly IDC) submissions for Fiscal Year 2002 totaled \$2 million (Fig. 12). The requested amount is approximately 10% of the total submission. The awarded amount of F&A is near 5% of the total requested. The amount awarded through the TAMU-CC office continues to show a gradual increase.

The total F&A awarded in Fiscal Year 2002 was \$613,648 (Fig. 12 and 13). The amount awarded on projects processed through TAMUC-CC continued to increase to \$498,146 for Fiscal Year 2002 (Fig. 13).

Figure 12
F&A Requested and Corresponding Awards

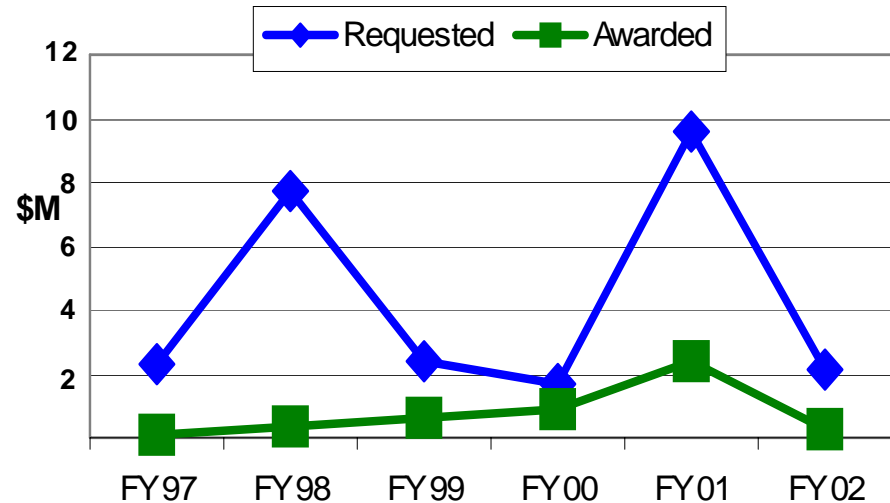

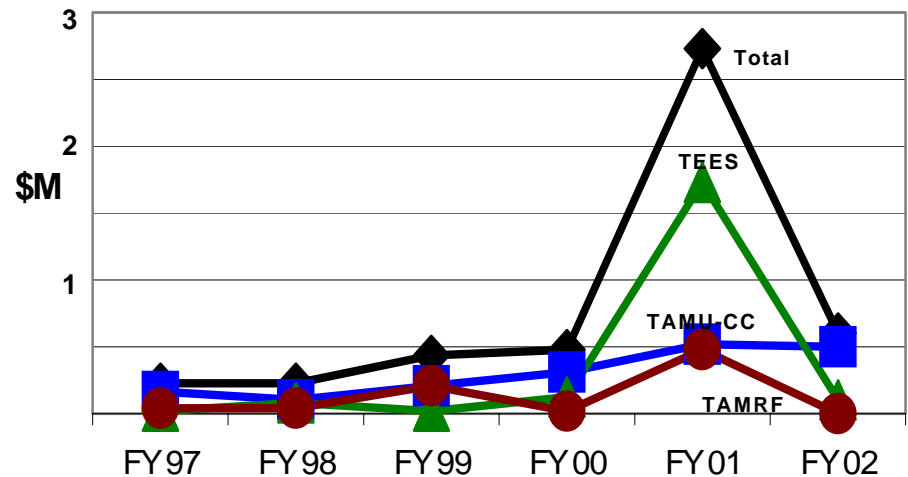

Figure 13
F&A Awarded by TAMRF, TEES and TAMU-CC

Faculty Research Enhancement Awards

University Faculty Research Enhancement Awards for Fiscal Year 2002 are listed in Appendix III. These funds are awarded and administered through the Office of Planning and Institutional Effectiveness, and normally provide funds for summer research. Research Enhancement awards often act as seed money for larger projects and publications. Since Fiscal Year 1999, a total of 37 grants were awarded. Eight faculty members received two awards and many grants were awarded to collaborators. The awards were made to faculty in the following entities: 15 PALS, 9 Humanities, 7 CAMS, 4 Education, 3 Business, 3 Social Sciences, and 1 Nursing. Of the individual faculty members who received awards, twenty-three, or 68%, submitted at least one extramural proposal, and some submitted numerous proposals. Of those who submitted, 16 or 70% received awards.

In addition to the University Faculty Research Enhancement awards, each of the four colleges also distribute funds to enhance research. In FY 2002 a total of \$66,515 was awarded for University projects and \$44,000 was dispersed equally among the colleges to allocate to projects within each college.

The Center for Educational Development Evaluation and Research (CEDER)

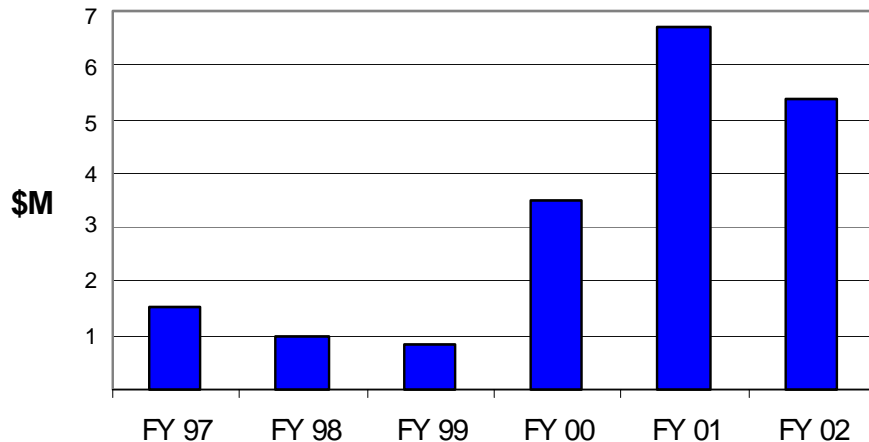

The Center for Educational Development Evaluation and Research (CEDER) facilitates and coordinates grants, research, publications, symposia and new initiatives for the College of Education. CEDER also facilitates evaluation and research for other educational agencies in Texas. The Director of CEDER is Dr. Jack Cassidy and projects are awarded after approval by the CEDER Board and the Dean of the College of Education. In the past 2 years, funds were obtained from Congressional appropriations, College Faculty Research Enhancement funds, the TAMU System and the Education Service Center to fund 20 different projects in the College of Education. These projects are listed in Appendix IV.

Research Expenditures

This is the first year to report “Restricted Research”. The expenditures attributable to restricted research spending are shown in Table 1, and are in the neighborhood of \$4 million. Expenditures do not match revenue because they may occur differently in each year of a multiyear award or proposals may be funded such that the award period does not end on August 31, the fiscal year end date.

The Texas Higher Education Coordinating Board annually reports research expenditures as submitted by institutions of higher education in Texas. Expenditures more accurately reflect the level of research activity. Awards tend to fluctuate making them a less stable indicator for year-to-year comparisons. The Office of the TAMU-CC Comptroller reported the following research expenditures from FY97 – FY 02:

Research Expenditures

Beginning in the Fall of 2001, House Bill 1839 created the Texas Excellence Fund. Texas institutions receive allocations based partially on the amount of Restricted Research expenditures they incur. For this reason TAMU-CC began reporting research expenditures as restricted and non-restricted in FY02. Restricted funds are funds for which some external entity has restricted the uses for which funds can be spent and the use of those funds must qualify as research. Research may be basic, applied or experimental development. This determination of Restricted Research is made in the Office of Graduate Studies and Research and concurred by the Office of Accounting. The Texas Excellence Fund awarded \$163,492 to TAMU-CC for FY02 based partially on the following data.

Table 1. Restricted Research Expenditures

FY 01	FY 02
\$2,779,362	\$4,066,575

Graduate Studies & Research Office Responsibilities

The Office of Graduate Studies and Research and the Office of Budget and Accounting administer the research function at Texas A&M University-Corpus Christi (TAMU-CC). Several other offices participate in this function as support personnel. These include Human Resources, Purchasing, Accounts Payable, Accounts Receivable and Travel. The System provides support through the Technology Licensing Office and by providing legal counsel.

The Office of Graduate Studies and Research houses the Dean of Graduate Studies and Associate Vice President for Research and Scholarly Activities. This position is the authorized institutional representative for submission of proposals and for contracting purposes. The Office includes three pre-award positions and two post-award positions. One pre-award position provides funding information for faculty, maintains a website and enters information into a database for tracking and reporting. The other two pre-award positions are responsible for budget and proposal development, agency forms, routing, copying and sending proposals. Pre-award personnel negotiate with sponsors to finalize an award or contract, occasionally using the services of the System legal counsel. Finally, pre-award assists two of the compliance committees by providing administrative support to the Institutional Review Board and the Institutional Animal

Care and Use Committee. Pre-award also ensures compliance on a number of issues prior to submission of a proposal.

Post-award personnel set up new accounts, monitor spending, prepare billing and financial reports for some awards, request extensions and perform closeouts. In addition, post-award personnel will assist PIs with hiring, payroll, travel and purchasing from sponsored funds. The Office of Human Resources is ultimately responsible for hiring personnel. Separate offices are in place for payroll, travel and purchasing/inventory processing. The Accounts Payable and Accounts Receivable offices provide invoicing and billing assistance as needed. The System Technology Licensing Office provides expertise for patents, licensing and copyrights when needed.

From August 1, 1996 - November 1, 2001, the Texas A&M Research Foundation administered several awards for TAMU-CC. The memorandum of agreement with the Foundation was put into place as a result of increased demand for research administrative services. The Research Foundation was seen as a way to provide research administration as the University built capacity and infrastructure.

In October of 2001, the Sponsored Programs function was reorganized at TAMU-CC and combined with graduate studies in response to the 2000 SACS accreditation recommendations. It was determined that the University should no longer outsource some of its

research administration and should retain the larger portion of grants management on campus. It was seen as more efficient to manage all or most of the research administration functions on-site. The growing role of research as a priority for TAMU-CC also prompted the decision to provide all research administration services on campus. The addition of the Harte Research Institute brought TAMU-CC to a new level with regard to research.

For these reasons, the decision was made that TAMU-CC would manage its own research administration. In the past year TAMU-CC negotiated a new arrangement with the Research Foundation such that TAMU-CC will manage the majority of the grant and contract submissions and accounting. A few grants will continue to be managed by the Foundation until they have expired. TAMU-CC and the Research Foundation negotiated an informal arrangement for management of special contracts. Some are also administered through TEES, TAES and TEEEX when those agencies submit the original proposal.

Members of the staff in the office of Graduate Studies and Research include:

Andrea Brown, System Support Specialist
Geri Fernandez, Secretary
Sandra Garcia, Sponsored Programs Coordinator
Renee Gonzales, Accountant
Phyllis Hughes, Sr. Administrator for Sponsored Programs
Dr. Harvey Knull, Dean of Graduate Studies & Associate VP for Research
Laura Rosales, CRA , Sr. Grants and Contract Administrator

Research and Scholarly Activity Council

The Research and Scholarly Activity Council enhances and monitors academic research activities at the University, including research administration, program oversight and program evaluation. The Council met several times in FY 02 and addressed several items of importance to research on campus. Some of these items include research incentives, postaward functions, responsible conduct of research, restricted research, developing a sabbatical policy, and federal initiatives. Members of the Council include:

Harvey Knull, Chair
Steve Barnes
Alan Berkebile
Grady Price Blount
Jim Bonner
Jack Cassidy
Leon Dube
Swint Friday
Mark Hartlaub
Ed Jones
David Kendrick
Abby Kratz
Tom Linton
Ross Purdy
Becky Torres
J.W. Tunnell
Robert Wooster

Compliance Committees

IRB

In compliance with federal regulations, TAMU-CC requires all research involving human subjects be approved by the Institutional Review Board (IRB). Research is defined as systematic investigation designed to develop or contribute to generalizable knowledge. The IRB has the primary responsibility for maintaining ethical standards of research involving human subjects at the University. The Board meets approximately once a month to review, discuss and approve protocol and informed consent forms for upcoming research projects. The extent of the review process is dependent on the nature of the research, which falls into three categories: exempt, expedited and full review. Ongoing projects are reviewed at least annually. The Office of Graduate Studies and Research provides administrative support and houses IRB files. During FY 02 the chair of the IRB attended IRB 101 training in Boston, MA and presented highlights of the training to IRB.

Members of the IRB for Fiscal Year 2002 are:

Mart Hartlaub, Chair	Father Felice
Margaret Bolick	Sam Hill
Ardys Boostrom	Roy Lehman
Patrick Crowley	Karen Middleton
Susan DeVaney	Joanna Mott
Joe Thedford	

Table 2. IRB Reviews FY 2001 FY 2002

	Number of Protocols	Number of Protocols
Protocols considered	58	58
Protocols exempted	23	26
Protocols expedited	30	23
Protocols withdrawn	1	2
Protocols extended	3	0
Protocols with full review	1	7

IACUC

The Institutional Animal Care and Use Committee (IACUC), as the agent for the University's obligations for humane care and use of animals, assures all activities involving animals meet the ethical and legal requirements for the humane care and use of animals. The IACUC is also responsible for educating the campus community concerning the ethical and regulatory considerations for the humane care of animals. Review, at least every six months, of the University's program and all animal facilities is required by federal regulations. The IACUC began its responsibilities in FY 02 with training provided by the Texas A&M IACUC. Members of the IACUC include:

Suzzette Chopin, Chair
 Graham Hickman
 Jo Ann McDonald
 Doug Posey, DVM
 Debbie Prevratil, Texas State Aquarium

Faculty Creative and Research Productivity

Appendix V was provided by the Jeff and Mary Bell Library and lists the scholarly pursuits and products of the faculty and staff in the 2001 calendar year. The following table summarizes Appendix V:

**Appendix IV
CEDER Projects
2001-2002**

Principal Investigator/Project Leader	Title	Description	Source of Funding	Start Date	Finish Date
*Merry Boggs <i>Teacher Education</i>	Phonics for Young Children	Two graduate courses were offered to local teachers in the summer of 2001 on ways to develop phonics in children ages 3-8.	Congressional Appropriation	July 2001	Sept 2001
John Brendel <i>Counseling</i>	Replication Study of Family Involvement in the Early Childhood Development Center	Replication of the 1997 study examining family's perceptions about the school, its programs, and its staff.	Congressional Appropriation	April 2002	Aug 2002
*Jack Cassidy <i>Curriculum & Instruction</i>	Research/Best Practice Symposia	A series of research and best practice symposia open to the public featuring the work of doctoral students and eminent authorities in education.	Congressional Appropriation	Oct 2001	April 2002
Jack Cassidy <i>Curriculum & Instruction</i>	Reading Trends & Issues: An Ongoing Study	A seven-year study of the issues and topics receiving attention in the English-speaking world.	Research Enhancement	Jan 2002	Aug 2002
*Jack Cassidy & Sherrye Garrett <i>Curriculum & Instruction</i>	CEDER Yearbook 2001, <i>Early Childhood Literacy</i>	A compilation of the research and program development that has taken place in the ECDC and Zavala Elementary schools from 1996-2001.	Congressional Appropriation	May 2001	May 2002
Rod Evans, Thomas Linton & Donald Kester <i>Educational Admin. & Research</i>	National Survey of Educational Leadership Doctoral Programs	A survey of educational leadership doctoral programs in the United States.	Research Enhancement	Jan 2002	Nov 2002
Sherrye Garrett <i>Curriculum & Instruction</i>	Developing Vocabulary in Young Children	A two-year project investigating the effect of intensive staff development in vocabulary/language acquisition on the learning of ECDC children.	Congressional Appropriation	Jan 2002	July 2003
Shelley Jackson <i>Counseling</i>	Giving Kids a Chance: Affective Vocabulary Development and Emotional Intelligence	A study to see the effect on emotional intelligence and affective vocabulary development of classroom guidance lessons.	Congressional Appropriation	Sept 2001	Feb 2002

* Professional Development Projects

Principal Investigator/Project Leader	Title	Description	Source of Funding	Start Date	Finish Date
Thomas Linton & Don Kester <i>Educational Admin. & Research</i>	Survey of Texas Citizens' Attitudes on Teaching as a Profession	A poll of 1000 Texas citizens about their attitudes toward public education replicating a national Lou Harris poll on the same topic.	TAMU System/ Washington Mutual	Sept 2001	Mar 2002
Frank Lucido <i>Teacher Education</i>	Bilingual Development in Early Childhood	A continuing study monitoring the English and Spanish development of the children in the ECDC.	Congressional Appropriation	Sept 2001	Aug 2002
JoAnn McDonald & William McEachern <i>Teacher Education</i>	The Effect of Professional Development Schools on the Expanding Roles of Public School Educators	A survey and interview of teachers and administrators to determine their roles in professional development schools.	Research Enhancement	Jan 2002	Sep 2002
Kaye Nelson <i>Counseling</i>	ACA Student Members' Perceptions of Personal Wellness and Stress	A survey exploring how graduate counseling students perceive their personal wellness and ability to manage stress.	Research Enhancement	Nov 2001	May 2002
Dan Pearce <i>Curriculum & Instruction</i>	Important Books/Studies in Reading/Literacy	A survey of reading professors to determine which books should be covered in graduate reading course.	Research Enhancement	Nov 2001	Aug 2002
Stephen Rodriguez & Thomas Linton Special Services, Educational <i>Admin. & Research</i>	Evaluation of Academics 2000 Cycle 8	An evaluation of the staff development programs in math, reading and writing offered to 108 schools in the Educational Service Center (ESC) Region 2.	ESC Region 2/TEA	Jan 2002	May 2002
Rachel Salas <i>Curriculum & Instruction</i>	Write On! An After-School Writing Program	An after-school writing tutorial program at Zavala Elementary School involving undergraduate students tutoring Zavala children in writing.	Congressional Appropriation	Jan 2002	Aug 2002
Jana Sanders <i>Curriculum & Instruction</i>	Computer Generated Art in Young Children	A comparison study of the developmental stages of art in three-year-old, four-year-old and five-year-old children's artwork using traditional art mediums versus artwork produced by a computer generated graphics art program.	Congressional Appropriation	Feb 2002	July 2002

Principal Investigator/Project Leader	Title	Description	Source of Funding	Start Date	Finish Date
Lon Seiger, Debbie Kanipe et al <i>Kinesiology</i>	Rhythm-Based Wellness: The Effects of Drumming on Stress	A study of the effects of thirty minute drumming sessions on the stress levels of ECDC children.	Congressional Appropriation	Oct 2001	Nov 2001
Lon Seiger, Debbie Kanipe and Yolanda Ray <i>Kinesiology</i>	The Effects of Drumming on State-Trait Anxiety in Children	A study to examine the effects of certain types of drums on state-trait anxiety in fifth-grade children at a local elementary school.	Congressional Appropriation	Apr 2002	May 2002
Robert Smith & Kaye Nelson <i>Counseling</i>	Assessments in Marriage and Family Counseling: Reviews and Critiques	A book describing and critiquing the assessments used in marriage and family counseling.	Research Enhancement	Oct 2001	Aug 2002
Joseph Thedford <i>Educational Admin. & Research</i>	Teacher Compensation: The Construct of Professionalism	A study investigating teacher compensation in Texas focusing on the highest compensated teachers and the factors contributing to these high salaries.	TAMU System	Oct 2001	Mar 2002
