# THE ACADEMY SPEAKS 2005

## DR. VANESSA FURSE JACKSON

Professor of English

University Excellence in Scholarly/Creative Activity Award Recipient 2004 – 2005

Dr. Vanessa Furse Jackson joined the University in 1993 and has been instrumental in developing a very successful minor in Creative Writing. With expertise in Victorian and Edwardian literature and creative writing, Dr. Jackson does it all – she has published both scholarly and creative works with enviable regularity.

Beginning her academic career by writing and publishing in the more traditional scholarly venues, Dr. Jackson published her first book, entitled *The Poetry of Henry Newbolt: Patriotism Is Not Enough*, with ELT Press from the University of North Carolina, Greensboro, in 1994. The monograph is an in-depth study and critical reassessment of the neglected poet's work. Situating Newbolt's poetry within the context of the manners, mores, and values of the late 19th and early 20th centuries, she examines the poet's enormous popularity at the time and argues that, in spite of the recent critical neglect of his work, he "is a minor figure who represents and illuminates major Victorian values and traditions". The book provides unique insight into the late Victorian and Edwardian periods in England. In addition to her scholarly book, Vanessa has also published critical essays on British writers: poet and essayist Alice Meynell, writer William Morris, and poet Mary Coleridge.

More recently, Dr. Jackson has dedicated much of her time to pursuing her creative writing. In April of 2003 she published a collection of short fiction, entitled *What I Cannot Say to You: Stories*, with the University of Missouri Press. The book consists of fourteen short stories, all revolving around human relationships, specifically issues of friendship and betrayal. After successfully placing and publishing a short story collection, Dr. Jackson's next challenge was writing a novel, which she did in summer of 2004. She has already submitted the 360-page manuscript, entitled *The ABC Club*, as well as an additional manuscript of short stories, entitled *Small Displacements*, which she completed drafting last year. Dr. Jackson has also successfully placed several other short stories, one of which, "Darrell's Garage," gained a nomination for the prestigious national Pushcart Prize (1999). Several of her poems are in print, two, "Commuter Awake" and "Summer Cries," were recently reprinted in an anthology, *March Hares: The Best Poems from Fine Madness, 1982–2002*.

Dr. Jackson has distinguished herself as a scholar, creative writer, and role model for students and faculty alike. She exemplifies collegiality and is a friend to all who have met her.

# RESEARCH AND SCHOLARLY ACTIVITY

## OFFICE OF GRADUATE STUDIES AND RESEARCH

The Graduate Studies and Research office provides Pre-award, Post-award and contract negotiation services for faculty, students and the community. In addition, services such as funding opportunity searches, workshops and administrative support for University Compliance Committees are provided.

This report provides a summary of several parameters that reflect a rapidly growing sponsored projects agenda at Texas A&M University–Corpus Christi. The indicators include but are not limited to sponsored projects revenue, expenditures, number of submissions, number of awards and of great relevance publications, presentations, and other creative & scholarly works. Compliance statistics relating to the IRB are also on the rise.

The University is at an exciting time with its sponsored projects agenda. Many of the parameters that characterize research have more than doubled in the past decade. This increase is expected to continue over the next decade. Over any short time interval such as one year little change is observed but restricted research doubled in five years and TAMU-CC is second in the system (After TAMU) in research expenditures. The number of proposals have increased about 50% over the last six years and likewise with revenue. The faculty size is anticipated to grow and the increased Center/Institute and PULSE growth, will contribute to the growing research & creative activity.

# SUBMISSIONS INCREASE TO 182

## NUMBER SUBMITTED VS. NUMBER AWARDED

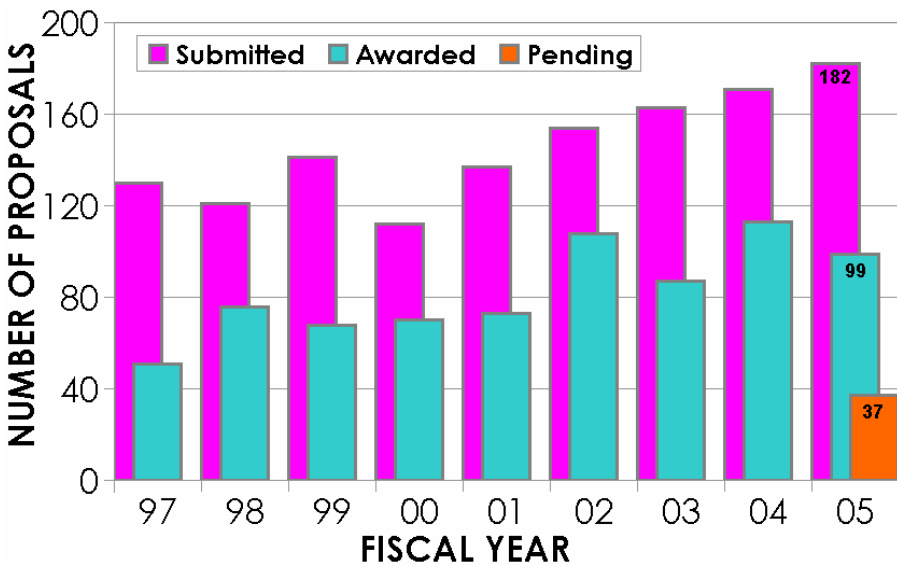

FIGURE 1: Number of Proposals Submitted and Number Awarded in FY05

The projects sponsored by external entities at Texas A&M University continue to increase. Figure 1 shows the number of submissions exceeded 180 for the first time. The number is continually increasing as is the number of awards. The award rate continues to exceed 50%. The number of multi year awards (awards that extend into the future years) is the highest to date and exceeded 70 awards in FY 05 which bodes well for FY 06. Pending refers to those still pending as of August 31, 2005; next years report will comment to include that portion of the 37 that were awarded.

## SUBMISSIONS: DOLLAR AMOUNT

Proposals submitted to a wide variety of sponsors approached \$50 million which is the largest total ever through the TAMU-CC Office (Figure 2). The submissions through the TAMU-CC Research Foundation have dropped to zero and TEES has like wise decreased to one or two per year. Further, TEES submissions are now included in the TAMU-CC totals because proposals submitted via TEES must first be routed through the TAMU-CC office. In the 1998 – 2001 period, both TEES and TAMRF had significant roles in Grants and Contracts with about 15-20 submissions per year and approximately half that number in active awards.

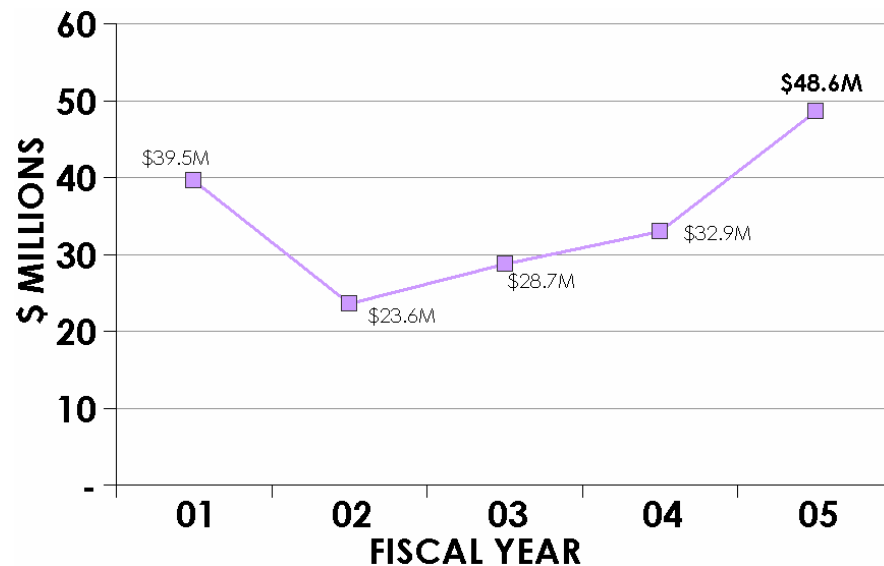

FIGURE 2: Dollar Amount Submitted

# REVENUE SPREAD WIDELY ACROSS CAMPUS

## AWARDS BY COLLEGE/DEPARTMENT

The awards by college (Table 1) show broad participation. The Centers and Institutes play a major role in grant and contract funding exceeding \$2.6 million. Also, the College of Education has exceeded \$2 million for the first time through a variety of funded programs. The TRIO Title V programs had an exceptional year generating \$3.2 million. The new program "PULSE" generated \$4.3 million. The numbers in Table 1 include totals of all awards for the year, single and multi year inclusive and compared directly to figure 3.

TABLE 1: Total Awards in FY05 Including Continuing Awards

# NEW AWARD REVENUE EXCEEDS \$15M

## REVENUE BY YEAR OF AWARD

The amount in new awards for FY05 (single year and multi year inclusive) was \$15.18 million.

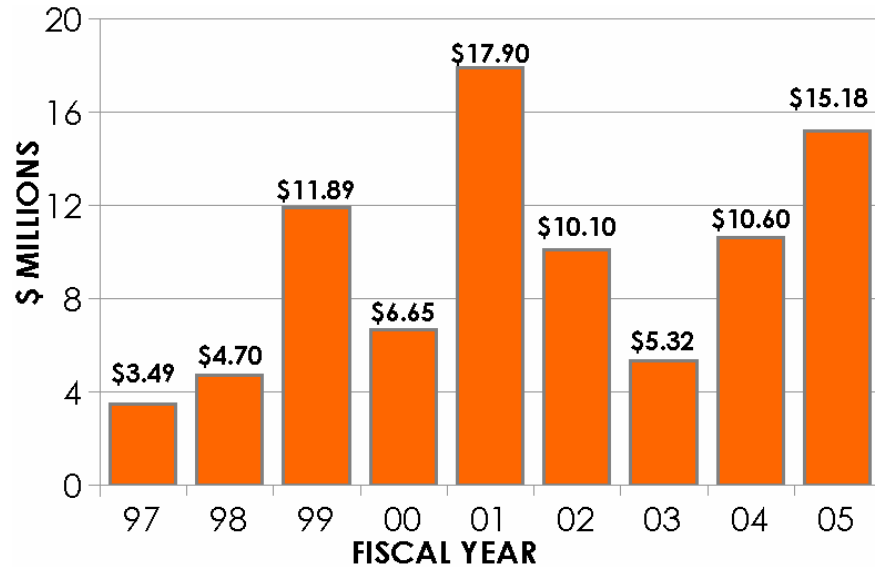

FIGURE 3: NEW AWARDS

## REVENUE BASED ON PROJECTED EXPENDITURE YEAR

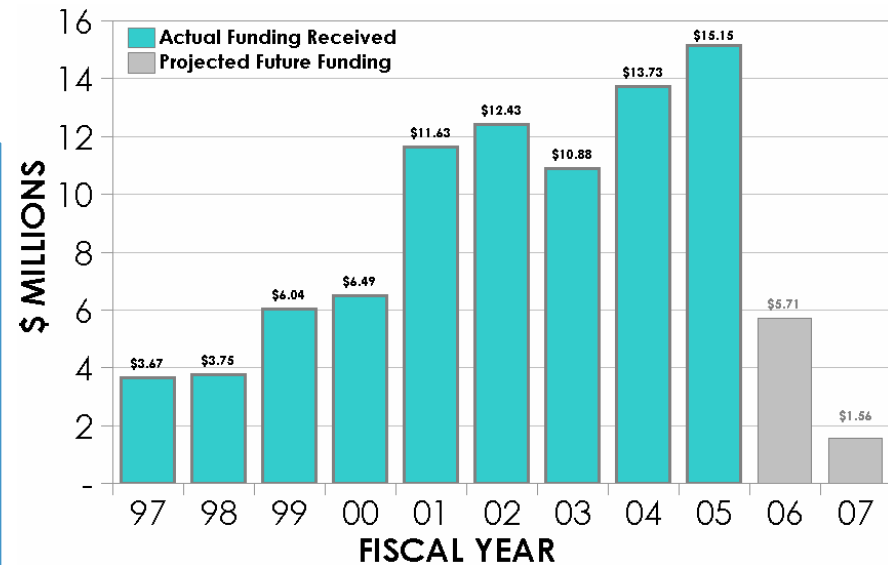

FIGURE 4: NEW PLUS CONTINUING AWARDS. Dollar Value Inclusive of Money Awarded in Previous Years but Continuing into FY 05, 06 and 07.

To get a better sense of activity from year to year, multi year awards have been spread into the years in which the expenditures are projected. (See Figure 4). Revenue is continually increasing and is now greater than \$15 million. The graph also shows a five-fold increase since 1997 when the award amount was about \$3 million and approaching an order of magnitude increase over a 10 year period from 95 and 96 when the award amount was about \$2 million. Finally as of August 31, 2005 there was \$5.71 million available for FY 06 and \$1.56 million for FY 07.

# MAJOR SOURCE OF FUNDING IS FEDERAL

## AWARDS BY SOURCE

Federal funding is predominant source of money for 2005 (Figure 5) and is double that of the last three years. The amount that is classified as "restricted research" continues to be just above 50%. (Figure 6) of the total. Private and Local refers to funding from sources such as the city, county and foundations. The list of awards for fiscal year 2005 are shown in Appendix I.

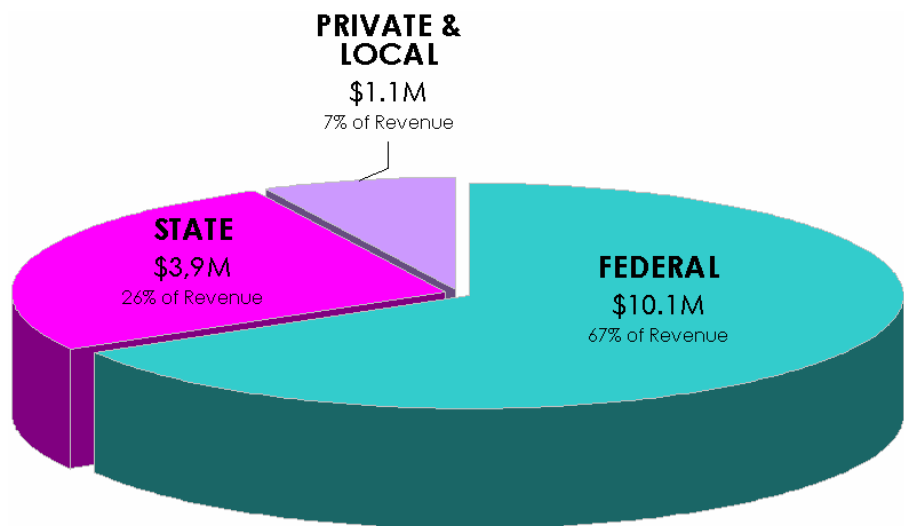

FIGURE 5: Proportion of Awards from Federal, State or Other Sources

## AWARDS BY TYPE

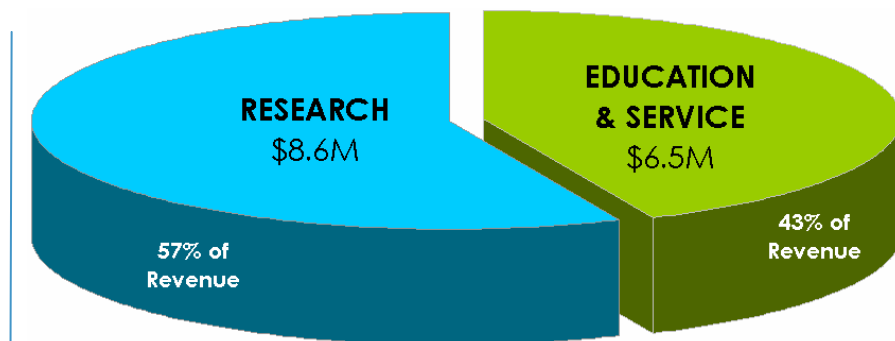

FIGURE 6: Awards Directed to Research Vs. Education and Service

Awards designated as research make up 57% of the total and the level is greater than any prior year. The research award amount for FY 05 of \$8.6 million compared with \$6.4 million in FY 04.

# EXPENDITURES

## FISCAL YEAR 2005 EXPENDITURES

Restricted Research Expenditures play a significant part in funding future research here at TAMU-CC. The Texas State Legislature returns research dollars to thirty five Universities across Texas using the Texas Research Development Funds as a source of delivery. The Texas Higher Education Coordinating Board manages this fund. Awards that were made from these monies are shown on page 8. In fiscal year 2005, total expenditures made from grants/contracts totaled over \$13M. These expenditures are broken down based on the funding requirements. Of the total expenditures, \$4.2M was classified as "restricted for research". There were an additional \$5.1M spent on research (non-restricted) and \$4M spent on other activities such as education and service.

# RESTRICTED RESEARCH

## RESTRICTED RESEARCH PLAYS INTEGRAL PART IN UNIVERSITY FUNDING

To qualify as a restricted research expenditure, the project must be properly classified as research and the source of funds must be from a restricted fund group. (OMB circular A-110, subpart A)

The classification of "restricted research" has become very important over the last few years. The Coordinating Board provides research dollars to our university based on the amount of restricted research expenditures that we had in prior years. This funding was initially called the Texas Excellence Fund (2005) and was renamed Texas Research Development Fund (2006). These funds allow faculty to initiate research projects that will provide data to be used in proposals to federal agencies in the hopes of generating additional restricted research awards and thus create a cycle of funding for the university. Appendix VI shows a listing of projects that were reported to the Coordinating Board as "restricted research" projects.

## TEXAS EXCELLENCE FUND

### AWARDS TO TAMU-CC FACULTY FROM THE EXCELLENCE FUND

This fund (now expired) was formerly called the Texas Excellence Fund was less favorable to TAMU-CC than the Texas Research Development Fund. The total granted to TAMU-CC for FY04 was \$328,432. Awards from that money are shown below.

<b>Lillian Waldbeser, S&amp;T</b> The effect of hypergravity & Microgravity on Macrophage...	<b>\$24,500</b>	<b>Psych, A&amp;H</b> Research Assistance for Health Psychology Doctoral Program	<b>\$12,345</b>

# SCHOLARSHIPS AND ASSISTANTSHIPS

## SPONSORED PROGRAMS GENERATE STUDENT JOBS & SCHOLARSHIPS

A large piece of becoming an institution with a serious research focus is supporting students to assist in the conduct of research. The dollar amount of scholarships significantly increased for fiscal year 2005. This money is a reflection of the commitment that our university has to supporting student opportunities for a research experience.

	<b>FY 2003</b>	<b>FY 2004</b>	<b>FY 2005</b>

# RESEARCH ENHANCEMENT

## AWARDS FROM THE RESEARCH ENHANCEMENT FUND

Internal monies are used to enhance all research on the campus. These monies are most beneficial as they raise the research profile access the university campus. These funds are usually used to provide faculty with funding to support their research during the summer. FY 04 was an unusual year in that \$315,000 was available versus \$110,000 in FY '05 which was the amount awarded since prior to 2000. Per university rules, 60% was used for campus wide competition only and awardees are listed below. The remaining 40% is distributed to the colleges according to a formula in the rules to support smaller projects in the colleges. The number of proposals for the university wide process was 16 resulting in 8 being funded.

The projects supported by the research enhancement committee are identified below:

<b>Janis Haswell</b> Researching the John Gardner Papers at the River Campus Libraries, University of Rochester	<b>\$7,163</b>
<b>Swint Friday</b> "Does Fund Size Matter? An Examination of the Influence of Scale Economics, Asset Heterogeneity and Subsidization on Domestic and International Equity Mutual Fund Expense Ratios and Risk-Adjusted Performance"	<b>\$9,513</b>
<b>Gregory Stunz</b> Essential Nursery Habitat for Red Drum: Recruitment Patterns of an Economically Important Fish	<b>\$12,791</b>
<b>Lillian Waldbeser</b> Isolation of Oyster Sperm Protein that Stimulates Spawning	<b>\$13,553</b>
<b>Elaine Young</b> Outcomes of Collaborative Problem Solving with Children	<b>\$2,711</b>
<b>Ajay Katangur</b> Evaluating the Performance of an Optical Multistage Interconnection Network (OMIN) with and without crosstalk	<b>\$10,563</b>
<b>Scott King</b> Motion Capture of Prosodic Information for Speech Synchronization	<b>\$11,190</b>
<b>James Silliman</b> Comparing Sample Preparation and Extraction Procedures for Organic Geochemical Applications	<b>\$14,107</b>

# COMPLIANCE COMMITTEES

As TAMU-CC receives larger numbers of federal awards, it is critical that compliance with federal regulations is maintained. The office of Graduate Studies & Research is currently the designated office for assurance of compliance.

## INSTITUTIONAL REVIEW BOARD (IRB)

The Institutional Review Board has grown in numbers as well as responsibility. Each year brings more protocols for review. Although fiscal year 2005 resulted in a decrease in total number of protocols, the number that required full committee review almost doubled. This trend is anticipated to continue as more faculty members are conducting research on our campus.

## INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC)

This committee was formed in 2002 to ensure the safety and proper handling of animals used in research at TAMU-CC. The committee conducts inspections of animal facilities every six months and verifies that proper logs are kept pertaining to the care of animals housed at the university.

### The committee members for fiscal year 2005 are as follows:

Dr. Greg Stunz – Committee Chair/Scientific Representative  
 Dr. Kirk Cammarata – Scientific Representative  
 Dr. Javier Villarreal – Non-Scientific Representative  
 Dr. Doug Posey – Veterinarian
